- Min. illumination: 0.5 lux (0 lux Nightvision mode)
- Nightvision distance: 12 to 15 meters with 12 infrared LEDs
- SD Slot: MicroSD card 16MB - 16GB capacity

Install a CCTV camera in less than a minute with no cables or cords anywhere you have track lighting. This revolutionary camera is powered by the track light bar and utilizes a secure Wi-Fi network to wirelessly carry the video feed to your receiver. Mounting is as simple as hooking up a track light, and the wireless CCTV system automatically detects and connects with the camera in less than a minute thanks to the efficient USS system pre-programming. They're dynamic and easy to move whenever you need to change or add coverage. You won't believe how simple and fast CCTV installation can be, and its versatility and features will relegate your old wired fixed cameras to the stone age.

### Fast, easy installation with no cables

- Save hours of installation costs and gain unimaginable flexibility in your camera location configurations
- Crystal clear video from anywhere you have track lighting
- No power or video cables
- Wireless video feed over secure Wi-Fi network
- Incredibly fast, easy installation with no system configuration
