Pear County County social face prevention and control system PPP construction project transaction results publicity

Release time: 2017-08-18

Pear County County social face prevention and control system PPP construction project transaction results publicity

Entrusted by the Pishan County Public Security Bureau, Zhongzhao International Tendering Co., Ltd. conducted a domestic open competitive negotiation on the PPP construction project of the social prevention and control system of Pishan County. The results of the transaction are announced as follows:

Name of the transaction project: PPP construction project of the social prevention and control system of Pishan County

Item Number: TC179H2TH

First, the main terms of the transaction:

1. The procurement scope of this project is the social capital of the PPP project of the social prevention and control system of Pishan County. The social capital of the transaction is responsible for the investment, financing, design, construction, operation, maintenance and handover of the project.
2. The project adopts the DBFOT operation mode. The sources of funds include equity capital and debt financing. The equity capital is funded by shareholders, and the debt financing is implemented by the social capital partners. The government-funded representatives and social capital parties determine their respective investment amounts according to their respective shareholdings in the project company. The winning social capital party will contribute in cash, and the government-funded representatives will contribute in cash or in kind. The capital gap between the total investment amount of the project and the monetary capital contribution is included in the fund by the project company as the financing entity, and the social capital negative party assists in the implementation.
3. The construction content of the project includes public security monitoring system, security bayonet system, high-altitude lookout system, electronic police system, big data center, network and security system, video public safety platform, mosque video lecture system, integrated operation and maintenance system, Command center construction, computer room and supporting projects, mosque video networking system, Judicial Bureau education conversion base monitoring system, and street retail alarm linkage system.
4. The estimated investment of the project is 335.99 million yuan. (The final result is the final audit of the completion acceptance audit)
5. The cooperation period is 21 years of the project life cycle, including one year of construction period and 20 years of operation and maintenance period. The operation period starts from the next day when the project is completed and accepted.
6. The return mechanism of this project is paid by the government.
7. Risk allocation structure In principle, the business risks such as project design, construction, finance and operation and maintenance are undertaken by the social capital party. The risks of laws and policies are borne by the government, and the risks such as force majeure are shared by both parties.
