**Proposal For Interior and Exterior CCTV For Two Metra Trains Stations**

I am seeking a proposal and quote for HD day/night cameras (1080p) with fixed views and remote monitoring for adequate coverage of the exterior and interior at two commuter stations. It should include recording hardware/software, and storage of the recorded data for 10-14 days. The commuter stations are the Stone Avenue station and the La Grange Road station, both in the Village of La Grange, IL. The remote monitoring will be at the La Grange 9-1-1 center.

Note that I have attempted to portray the desired exterior camera views at the two stations with some rudimentary graphics.

The proposal should include all hardware, installation, maintenance costs, and/or other related costs.

**Special Circumstance:**

The Stone Avenue Station is due for renovation and remodeling at some point in near future; the dates for that project have not been identified at this point in time. Consequently, any installation of cameras at the Stone Avenue location would necessitate the removal of the exterior cameras, when fascia and siding are being replaced, followed by the re-installation of the cameras when the remodeling is completed. Please provide a separate cost projection for that aspect for evaluation purposes.

I will be the point of contact for your questions and your submissions. Thank you in advance for your thoughtful consideration of this project.
